PROJECTS

Innovative AI
MERN Stack

- Developed a full-stack MERN application for real-time collaboration and AI-assisted development.
- Implemented user authentication and role-based access using JWT and secure REST APIs.
- Integrated AI-powered prompt generation to automate task creation and code assistance.
- Deployed and tested application features to ensure performance, security, and a reliable user experience.
- Built scalable backend services with Node.js, Express.js, MongoDB, and real-time messaging support.

Role-Based Project Management System
MERN Stack

- Created a web application with admin, manager, and employee dashboards based on MERN.
- 40 percent faster task assignment thanks to improved API handling
- Secure role-based access control and JWT authentication were integrated.
- Made it possible to create projects, assign tasks, and monitor progress.
- React and Tailwind were used to create a responsive user interface for a smooth workflow.

AgriTrade
Java, Spring Boot, React, MySQL

- Developed a full-stack e-commerce platform for farmers, merchants, and admins to trade agricultural products.
- Implemented secure login, role-based access, and product/transaction management features.
- Designed RESTful APIs using Spring Boot and integrated them with a dynamic React frontend.
- Optimised database operations in MySQL for smooth and reliable data handling.

CERTIFICATION & ACHIEVEMENTS
