CAREER OBJECTIVE

MERN stack developer with expertise in Node.js, React, and JavaScript. completed practical internships and developed full-stack applications with real-time collaboration, role management, and authentication. a strong approach to problem-solving that emphasises scalable development.

EDUCATION

Buddha Institute of Technology, Gorakhpur

Bachelor of Technology in Computer Science and Engineering

Gorakhpur, India

August 2022 - June 2026

St. Xavier's School, Salempur, Deoria (CBSE)

Completed Higher Secondary Education (12th)

2021

Completed Secondary Education (10th)

2019

SKILLS SUMMARY

- **Programming Languages:** Java
- **Frontend:** HTML, CSS, JavaScript, React.js, Next.js, Tailwind
- **Backend:** Node.js, Express.js
- **Database:** MongoDB, MySQL
- **Tools:** VS Code, IntelliJ IDEA, Git, GitHub, Postman, MongoDB Compass and Netlify
- **Soft Skills:** Leadership, Communication, Problem-Solving, and Collaborative Teamwork

EXPERIENCE

Summer Intern – Softpro India Computer Technologies Pvt. Ltd.

Grade: A+ – Focused on Java with Spring Boot, React, and enterprise-level project development.

Onsite

Jun 2025 - Aug 2025

Intern – TEACHNOOK (TeachScape Online Learning Services Pvt. Ltd.)

– Enhanced frontend-backend integration abilities while working on web development projects.

Remote

Oct 2024 - Nov 2024

PROJECTS

Innovative AI (Ongoing)

MERN Stack

- Built a platform for real-time communication and AI-assisted development.
- Integrated chat collaboration and AI-powered prompt generation.
- Enabled smooth teamwork and automated code or task generation through AI interaction.
- Currently implementing authentication and message synchronization modules.
- Developed backend with Node.js, Express.js, MongoDB, and Postman for authentication and API testing.

Role-Based Project Management System

MERN Stack

- Created a web application with admin, manager, and employee dashboards based on MERN.
- 40 percent faster task assignment thanks to improved API handling
- Secure role-based access control and JWT authentication were integrated.
- Made it possible to create projects, assign tasks, and monitor progress.
- React and Tailwind were used to create a responsive user interface for a smooth workflow.

AgriTrade

Java, Spring Boot, React, MySQL

- Developed a full-stack e-commerce platform for farmers, merchants, and admins to trade agricultural products.
- Implemented secure login, role-based access, and product/transaction management features.
- Designed RESTful APIs using Spring Boot and integrated them with a dynamic React frontend.
- Optimised database operations in MySQL for smooth and reliable data handling.

CERTIFICATION & ACHIEVEMENTS

- Internship at **Softpro India (A+ Grade)**
- Internship at **TEACHNOOK (TeachScape Online Learning Services)**
- Completed a certified workshop on Artificial Intelligence and Machine Learning conducted by **GeeksforGeeks**, gaining hands-on exposure to core AI concepts and model implementation.
- Active Participant – College Tech Events:**Tech Yuva-2024** Engaged in various technical events, delivering project demonstrations and participating in collaborative problem-solving initiatives.
